Abhay Kashinath

UI UX / Product Designer

AI Augmented Workflows

User Experience and Interface Designer with 3+ years leading end-to-end product design, backed by close to 10 years of broader IT and product experience. Skilled in creating user centric, scalable designs using Figma, Framer, Adobe XD, and AI design tools such as Higgsfield AI and DaVinci AI. Augments the design process with AI powered workflow automation using n8n and Claude for research synthesis, prototyping speed, and production efficiency. Focused on usability, clarity, and building interfaces that align business goals with user needs.

Work Experience

Z21 TechLabs
Experience Designer,
AI Automation Specialist
2026 - Present

- Automated end to end social media content pipelines using two approaches: Claude combined with Higgsfield AI, and n8n workflows combined with ChatGPT image generation, to generate and publish posts directly to client social pages.
- Designed website and dashboard interfaces, including AI-assisted website animations, for clients such as Z21 Techlabs (AI transformation for small businesses).
- Trained and directed AI image generation tools, including Higgsfield AI and ChatGPT image generation, to produce on brand social media post designs for clients.
- Produced AI generated videos and images for social media and marketing campaigns across multiple client accounts.

EY Ernst and Young
UI UX Designer & PMO
2023 - 2025

- Owned the end to end design process for internal digital products from understanding user needs to delivering high fidelity UI across multiple teams.
- Worked closely with product managers and engineers to turn business requirements into practical, user friendly solutions.
- User research, usability testing and feedback to refine product experiences over time.
- Ran design reviews and shared findings with stakeholders to keep teams aligned on direction and quality.

Project Operations & Talent Enablement (PMO)

- Helped identify and evaluate senior design and tech talent for project teams, working with delivery leads and stakeholders.
- Got a close look at how large enterprise teams are structured, staffed, and managed across longterm programs.
